DETAILED ACTION

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

None of the prior art of record, alone or in combination, teaches the limitations of Independent Claims 1, 23 and 29 as currently amended. Specifically, the claim limitations "at least two of the plurality of Assembler modules include at least one DL Assembler instruction ...identifying, by a linkage editor, a first data entity in a first run unit of the plurality of run units using a first DL Assembler instruction, and a second data entity in a second run unit of the plurality of run units using a second DL Assembler instruction, wherein the first DL Assembler instruction and the second DL Assembler instruction identify character strings which are required to appear only once in the executable file, further comprising: setting the first data entity to a first value included in the first DL Assembler instruction, and setting the second data entity to a second value included in the second DL Assembler instruction " are not taught by the prior art in combination with the other limitations of the independent claims 1, 23 and 29.

The closest prior art of record US Patent 5,966,702 Fresko et al, teaches a system of compiling run module constants into a pool of common constant when creating a run file. However this reference does not teach the specific use of the DL assembler instructions described in the limitations of the amended independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2191

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
